SAURABH SINGH

- +91-6360522060
- saurabh6.jobs@gmail.com

SUMMARY OF SKILLS

- **5 years** of experience in developing web-based and enterprise applications using **Java SE/EE, Spring Boot, Spring MVC, and Hibernate (JPA)**.
- Proficient in **OOPs, multithreading, collections, Java 8/11/17**, and **core Java concepts.**
- Hands-on experience with Microservices architecture, **Apache Kafka, and RESTful APIs**.
- Strong understanding of **Creational** (Singleton, Factory, Builder), **Behavioral** (Strategy, Cache), and **Microservices** design patterns (SAGA, Circuit Breaker).
- Strong hands-on experience with various Spring modules including **Spring Batch, Spring AOP, Spring MVC, Spring Security & Spring Transaction**.
- Skilled in SQL and database development with **Oracle, MySQL, DB2 & Redis.**
- Proficient in unit testing using **JUnit and Mockito**.
- Knowledge of front-end technologies like **HTML5, CSS3, JavaScript, React, JSON, and XML**.
- Familiar with Agile methodologies and software development best practices across **SDLC/STLC**.
- Exposure to **Autosys, Grafana, Prometheus**, **Swagger & Confluence** for documentation and observability.
- Experienced with CI/CD tools and version control (**Jenkins**, **Maven, Gradle, Git, GitLab, Docker, Swagger**).

WORK EXPERIENCE

Lead Software Engineer | Bounteous X Accolite | Client: Morgan Stanley

June 2025 - Present

LLM Java Developer | Turing | Client: Apple, Meta

November 2024 – April 2025

Digital Specialist Engineer | Infosys Limited | Client: Danske Bank

January 2023 – October 2024

Associate Systems Engineer | Tata Consultancy Services Limited | Client: Kotak Mahindra

May 2021 – January 2023

PROJECTS

Morgan Stanley Leto Project

- Engineered an end-to-end deposit ingestion pipeline, including **file-watcher** triggers, dependent **batch jobs**, **cURL-based API chaining**, **DTO construction**, attribute mapping, validation logic, and **enrichment** orchestration for downstream **CUSIP generation**.
- Designed and implemented a **structured service layer** to convert raw external deposit records into consistently enriched domain objects, enabling accurate processing and booking within the **Treasury Deposits ecosystem.**
- Built integration flows to **Thought Machine**, ensuring seamless conversion of **booked deposits** into **Trades** and **Cashflows**, with durable **DB persiste**nce and traceable processing paths.
- Created a **Cashflow extraction API** that reads bulk data from the database, generates formatted **Excel files**, and reliably drops them to **NFS locations** consumed by **multiple downstream teams**.
- Improved **data integrity** and **operational accuracy** by enforcing strict validations, executing **cashflow reconciliation** against external inputs, and ensuring only **affirmed payments** route to the **Payments function**.

Meta LMSYS Project

- Enhanced **Large language models (LLMs)** by utilizing **Reinforcement Learning with Human Feedback (RLHF)** techniques to improve response **accuracy, completeness,** and relevance to **Real-world applications**.
- Designed and implemented strategies to align **AI** outputs with user expectations by **incorporating iterative feedback, optimizing performance**, and ensuring robust model behavior across diverse scenarios.

Digifarm-FI | Kotak Mahindra Bank

- **Designed** and **implemented** secure and scalable modules for **customer onboarding**, **eKYC processing**, and **authentication services**.
- Created two **RESTful microservices** for **customer data management** and **identity verification, ensuring modularity.**
- **Developed** secure **login** and **customer onboarding workflows** for **Business Correspondents** to facilitate rural account opening.
- **Created** two **scalable microservices** for **customer data handling** and **eKYC verification** using **government ID APIs.**
- Collaborated with cross-functional teams to deliver a user-friendly, **low-bandwidth optimized banking solution**.
- Ensured **data integrity** and **regulatory compliance** through **rigorous validation, testing, and backend integration.**

EDUCATION

DCRUST University **Haryana, India**

Bachelor of Technology
